

## SERVICE AND CONSULTANCY

- Consultants are always **on site at the sawmill to get to know the operation and provide** expert advice on the purchase of suitable tools, taking into account **the individual capabilities** and **needs of the customer**.
- **Distance is not an obstacle for us.** We will come to the other side of the world to meet you.
- **A personal and comprehensive approach to business.** Bandsaw blades and circular saws for the maximum machine performance.
- **Full tool maintenance** on the professional machines.
- **Regular maintenance** by a trained technician.
- **We advise** on the purchase, operation and adjustment of the sawmill machine.

*Customers will never hear the word "cannot" from us!*

## OWN TRANSPORT

- We have **our own fleet of vehicles**, manned by our own drivers, which are always on the road and available for the collection and delivery of bandsaw blades.
- We understand that your machines should not be idle, but should always be working at **100 % capacity**.
- **Weekly delivery service** throughout the Czech Republic, Slovakia, Poland, Austria and Germany.

## WE OPERATE WORLDWIDE

- Our bandsaw blades are used not only in Europe, but on **almost every other continent**.
- We come to **the other side of the world** to meet you.
- Always **on site at the sawmill to get to know your operation**.
- We will design a **customised solution** to ensure your bandsaw blades and circular saws deliver **maximum machine performance**.
- For deliveries of bandsaw blades abroad, we use the services of **external transport companies**.

*Our business always starts with you, our customer.*

**DUDRTOOLS**  
*The joy of cutting*

# Top Bandsaw Blade manufacturer

- one of the world's leading suppliers of bandsaw blades
- a supplier with a personal and individual approach to the customer
- a trustworthy and fair employer
- a socially responsible company

www.dudr.cz

## WIDE BANDSAW BLADES

Emphasis on maximum performance while maintaining the quality of the cut

- **Primary** processing of wood.
- **Stellite - tipped.**
- Material **Uddeholm - a high-quality Swedish steel** produced by **Voestalpine**.
- We produce bandsaw blades **up to 320 mm wide**.
- Variation of **double-sided** bandsaw blade.

## THIN-CUTTING BANDSAW BLADES

Suitable for CNC bandsaw machines to maximise the efficiency of the cutting

- **Secondary** processing of wood.
- For the processing of **expensive and exotic materials** where **high accuracy and quality of cut** is required.
- Material **Uddeholm - a high-quality Swedish steel** produced by **Voestalpine**.

## RIPPER BANDSAW BLADES

Maximum cutting efficiency suitable for mobile and smaller sawmills

„We use a machine specially developed by our company. It works on the principle of machine processing of the camera image, where we can **guarantee precise tooth distribution** with an accuracy of **hundredths of a millimetre**. We offer sharpening of bandsaw blades with a professional sharpening machine from the German manufacturer **Kohlbacher**.“

Tomáš Dudr

We purchase our bandsaw blades from the world's leading manufacturer of saw blades, the English company **Dakin-Flathers**.

## CIRCULAR SAWS

A wide range of circular saw blades in many variants of application, number of teeth and designs

- For cutting dry, wet, hard and soft wood, as well as blades for cutting laminate, chipboard, MDF boards, plasterboard, etc.

- **We always adapt the specification** of the bandsaw blade to the characteristics of the bandsaw machine and the customer's needs.
- The main welds on bandsaw blades **up to 210 mm wide are butt-welded**. Our main welds are lifetime guaranteed.
- **Full service:** revision, levelling, sharpening, repairing, consultancy, collection / delivery.

Cutting kerf: 1,8-4,2 mm	Tooth finishing: Stellite
Bandsaw blade width: 50-320mm	Service and sharpening: Yes
Processing: Primary	Material: Uddeholm, 80NiCr11, EHS

Cutting kerf: 1,2-1,8 mm	Tooth finishing: Stellite
Bandsaw blade width: 50-100 mm	Service and sharpening: Yes
Processing: Primary	Material: Uddeholm, 80NiCr11, EHS

### Material RipperS

High quality steel with **deep hardened teeth by induction technology**. Ensures **high accuracy, cutting speed**, less waste and **clean cut, lifetime guarantee** on welds.

### Material Bimetal (Ripper37B M42)

**Body and teeth** are made from two different types of steel. The teeth are made from **cobalt steel**, ensures **longer blade life** compared to **RipperS**.

Cutting kerf: 1,8-2,8 mm	Tooth finishing: Rast-set
Bandsaw blade width: 32-38(51)mm	Service and sharpening: Yes
Processing: Primary	Material: RipperS, Bimetal (Ripper37B M42)

## OUR OWN TECHNOLOGY

- We deliver the highest quality products to our customers, so we set about improving our production machinery and processes.
- We create a center for our own development activities in the field of machine design.
- We develop our own machines and systems by seeing them in actions, observing their daily shortcomings and advantages.
- We respond flexibly to production requirements and gradually refine everything to perfection.
- Each new machine we produce incorporates the knowledge gained from previous models, making everything more user-friendly and technologically advanced.
- In the future, we intend to increase the proportion of robots in our company.
